

Bullows BP 630 Spray Gun

Ordering Information (Part No.-100630)

FEATURES:

Bullows spray gun is the first choice of every painter in the industrial paint shop. These are rugged spray guns suited for tough and continuous operation, at the same time ensuring top quality performance and finish.

This performance is achieved by a combination of large smooth flowing air passage and an oversize air valve, which gives the lowest pressure drop. This combination with new wide range of air nozzles, provides a performance which is unique in spray painting applications.

Quick and accurate stipple pattern is achieved by an Air Pressure Control Valve available at the rear of the gun. This also controls pressure for fine shading or delicate work.

These guns are suitable for all general industrial spray painting applications.

TECHNICAL SPECIFICATION:

Sr No.	Description	Unit
1.	Fluid Nozzle orifice (mm)	0.8, 1, 1.2, 1.5, 1.8, 2.0, 2.5 mm
2.	Pattern width (inch)	2 -12 inch
3.	Operating Air Pressure (bar)	2-4 bar
4.	Air Consumption	15-20 (cfm)
5.	Weight	780 gm
6.	Cup Capacity	400 ml, 500 ml

General Application Sectors:

Automobile Industry
Heavy Engineering
Ceramic Industry
Drums & Barrel

General Engineering
Leather Industry
Defence / steel
Metal / Wood / Plastic
