

# WA 101 Automatic Spray Gun

Bullows WA 101 automatic spray gun has been designed by keeping customer's requirement in mind. Unmatched continuous performance application with ease of maintenance together give the ultimate result in automatic air atomizing spray finishing equipment

This automatic spray gun is highly suitable for painting of small & medium component in mass production and highly applicable in General Engineering & other related Industries.

## KEY FEATURES:

- Suitable for high volume production
- Rapid triggering response rate. Accessible atomizing & spreader air control / fluid flow control
- Applications Specific Models for industrial Coatings, Pharma & Food Industries
- A choice of Air Cap with standard Tip & Needle combination in MS & SS. of Ratchet controlled fluid flow adjusting mechanism
- A zero indicator for easy repeatability of the fluid flow settings

## TECHNICAL SPECIFICATION:

Sr No.	Description	Unit
1.	Operating Pressure	2-4 bar
2.	Pattern Size (mm)	370
3.	Nozzle Size (mm)	0.8, 1.0, 1.3, 1.5, 1.8
4.	Weight (gm)	440
5.	Needle and Material Nozzle MOC	SS (304)

## General Application Sectors:

- General Engineering
- Leather Industry
- Defence / steel
- Metal / Wood / Plastic
- Automobile Industry
- Heavy Engineering
- Ceramic Industry
- Drums & Barrel
